successful interaction with products tools and technologies depends on usable designs and accommodating the needs of potential users without requiring costly training in this context this book is concerned with emerging ergonomics in design concepts theories and applications of human factors knowledge focusing on the discovery design and understanding of human interaction and usability issues with products and systems for their improvement this book will be of special value to a large variety of professionals researchers and students in the broad field of human modeling and performance who are interested in feedback of devices interfaces visual and haptic user centered design and design for special populations particularly the elderly we hope this book is informative but even more that it is thought provoking we hope it inspires leading the reader to contemplate other questions applications and potential solutions in creating good designs for all

this book provides design assistance with the actual mechanical design of an engine in which the gas dynamics fluid mechanics thermodynamics and combustion have been optimized so as to provide the required performance characteristics such as power torque fuel consumption or noise emission

this book provides a multidisciplinary overview of the design and implementation of systems for remote patient monitoring and healthcare readers are guided step by step through the components of such a system and shown how they could be integrated in a coherent framework for deployment in practice the authors explain planning from subsystem design to complete integration and deployment given particular application

constraints readers will benefit from descriptions of the clinical requirements underpinning the entire application scenario physiological parameter sensing techniques information processing approaches and overall application dependent system integration each chapter ends with a discussion of practical design challenges and two case studies are included to provide practical examples and design methods for two remote healthcare systems with different needs
